AIRMIND

PANEL™

AirMind **Panel™** is an interactive collaboration touch panel that is designed from ground-up to meet your modern meeting room requirements.

The 65" UltraHD 4K display with a seamless MultiTouch experience as a large Android™ Tablet - just at the press of a button.

TOTAL MEETING ROOM SOLUTION

AirMind™ interactive panel has the capability to double up as a meeting room computer. With in-built award-winning EyeRIS™ interactive sensor technology, this interactive panel gives you the speed, accuracy, and the precision during any meeting.

You can connect your personal devices such as your tab or phone to ideate, brainstorm, and collaborate with your colleagues, irrespective of your geographic location. AirMind **Panel™** doubles up as a meeting room computer that eliminates the need of carrying a laptop or having a dedicated desktop computer installed in the meeting room, saving precious time and cost.

Built-in Wireless Direct Access Point

AirMind Flow™- Software with industry leading collaboration tools

Seamless multi touch inputs and gestures

Plug and Play- No driver installation on any O/S

MyCloud™- Free Content download engine

Smooth and fast writing speed

YOU CAN DO MORE!

This touch-enabled panel runs on AirMind Flow software that lets you collaborate with your peers irrespective of their geographic locations

Share your ideas, reports, from your desk using the capability of AirMind to act as a Wireless Direct access point for other devices such as iPads and Android™ tablets

Create, ideate & brainstorm, all on this large interactive panel
